

Enviromec

Our range of Interlok system vacuum cleaners are unique. After discussing your requirements we choose the motor head, power, type and rating. This motor head can be a series of 1, 2 or 3 motors at a minimum of 1000W per motor in various voltages. Alternatively we build the heads with an air driven option (for use with your supply of compressed air) for explosive or volatile areas. We add to this the type of filtration required, for fine dust, hazards or flammables etc. Finally we decide on the size of container to use, and the most suitable accessories kit.

We stock the motor heads, filters, kits and containers - in a range from 9 to 200 Ltrs capacity. We can assemble quickly and in an unlimited number of combinations. Motor + Filtration + Container = Interlok. This means we can provide bespoke units, at off the shelf prices and delivery times.

Commercial Suction Vacuum Cleaner

Built without compromise this compact vacuum cleaner is fitted with a 1,000W heavy duty vacuum motor of the latest design. Its pressed steel vacuum head and mirror finish stainless steel canister is lightweight yet robust enough to take heavy use.

Designed to be maneuverable and stable due to its four widely spread 75mm castors mounted on a sturdy moulded plastic chassis. These advanced design features make this model especially suitable for schools, hotels, restaurants, contract cleaning, offices and public houses, yet remains light and compact enough for domestic use.

Features:

- double filtration
- choice of disposable bag or re-usable cloth bag
- motor protected by thermal cut out switch
- TV and radio suppressed
- exhaust blower with diffuser
- 32mm Tool kit:
- 2.5mm crush-proof hose assembly
- stainless steel bent end with suction adjuster
- 2 x stainless steel wand
- combination carpet/hard floor nozzle
- upholstery/stair nozzle
- dusting brush
- crevice tool
- optional extra - a high efficiency filter
