Heavy Duty Industrial Dry Pick Up or Wet and Dry Vacuum Cleaners

Designed for mobility and ease of use this range of industrial vacuum cleaners has a canister, chassis, float and motor head made from resilient and dent proof injection moulded plastic.

This model range is available as either dry pick up or wet and dry. The advanced specifications of these vacuum cleaners make them particularly suitable for school, workshops, contract cleaning, warehouse, factories etc.

Features:

- Choice of one or two vacuum motors
- Resilient dent proof construction
- Canister chassis
- Float and motor head made from corrosion resistant plastics
- Wet models easily converted to dry pick up
- Motor protected against overheating by thermal cut out switch
- Dry models feature two stage filtration system
- Hose entry accepts 32, 38 or 51mm hoses

Options:

- High efficiency second stage filter
- 32, 38, 51mm hose and tool kits
